

'Thinking for the Future'  
**The Ewe Lift**

**2013 The Land/NSW Farmers  
FARM Inventor of the year**

**1<sup>st</sup> Prize Regional Henty  
Machinery Field Days**

**3<sup>rd</sup> Prize Australia National  
Orange Field Days**

## Functions

- Easily lifts sheep in a safe and reliable manner
- Improves efficiency and productivity IN EVERYDAY WORK

## Benefits

- Easily compacted for transport, storage and usability
- Improves health of livestock and ability to treat injured animals.
- improves workplace health and safety
- reduces injuries and strains

## The story

Began as a small time HSC Design & Technology project where I was determined to OVERCOME MY FATHER'S EVERYDAY STRUGGLE IN SHEEP WORK. Living on the farm allowed me to understand issues that many farmers face when handling sheep, especially injured ones. MY FOCUS HAS BEEN ON IMPROVING THE WELFARE OF THE FARMER'S BACK and their LIVESTOCK.

## Qualities

Made in Australia by Australians and meets Australian standards.

Galvanized steel design

## Innovation

Webbing design allows sheep to be positioned in numerous ways:

- standing up
- sideways
- AND ON their back

# How the 'Ewe Lift' works

**1. Roll**

**2. Lift**

**3. Push**

**Supports injured animals**
